

Programming 1) pg 372

```
Map<String, Integer> wordCount =  
    new Map<String, Integer>();  
wordCount.put(word, timesUsed);
```

```
2) public Map<String, Integer> buildWordCount(Scanner scan)  
{  
    String word;  
    Integer count;  
    Map<String, Integer> wordCount =  
        new Map<String, Integer>();  
    while (scan.hasNext())  
    {  
        String word = scan.next();  
        count = wordCount wordCount.get(word);  
        if (count != null)  
        {  
            wordCount.put(word, count + 1);  
        }  
        else  
        {  
            wordCount.put(word, 1);  
        }  
    }  
    return wordCount;  
}
```

Self-Check 1)

pg 371

- a) ISBN because it is different for each book
- b) ~~player's~~ player's name is different for each player
- c) model number different for each computer type
- d) course ID different for each course
